**(54) STRUCTURIZED SURFACE HAVING PROPERTY FOR INHIBITING CELL PROLIFERATION,  
METHOD FOR PRODUCING THE SAME AND USE THEREOF**

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a structured surface having properties for inhibiting the proliferation of cells and further inhibiting the adhesion of the cells.

SOLUTION: This structured surface is obtained by providing upheaved parts having 50 nm-10  $\mu$ m average height and 50 nm-10  $\mu$ m average interval to an unstructured material having  $\geq 20$  mN/m surface energy by mechanical embossing, lithographical etching, or molding processing.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of  
rejection][Kind of final disposal of application other than  
the examiner's decision of rejection or application  
converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of  
rejection][Date of requesting appeal against examiner's  
decision of rejection]

[Date of extinction of right]
